Time-resolved IR Spectroscopy of Radicals in Chemical Reactions

(化学反応中のラジカル種の時間分解赤外分光)

by Akihiro Maeda (前田 晃宏)

Department of chemistry, Graduate School of Science, Hiroshima University
Contents of the thesis

Chapter 1. General Introduction
  1.1 Introduction
  1.2 Time-resolved IR spectrometer
  1.3 IR observation of the photocatalytic degradation of pivalic acid on TiO$_2$ powder
  1.4 IR observation of cyclopentane-1,3-diyld diradicals in solution

References

Chapter 2. Time-resolved IR Spectrometer
  2.1 Introduction
  2.2 The constructed Time-resolved IR spectrometer
  2.3 TRIR observation with the constructed TRIR spectrometer
  2.4 Estimation of the time resolution of the TRIR spectrometer
  2.5 The cells used for the TRIR measurement

References

Chapter 3. IR Observation of the Photocatalytic Degradation on TiO$_2$ Powder
  3.1 Introduction
  3.2 IR observation of the photocatalytic degradation of pivalic acid on TiO$_2$ powder
    3.2.1 Purpose of research
    3.2.2 Sample preparation
    3.2.3 Results and discussion
  3.3 Summary and conclusions
Chapter 4. IR Observation of Cyclopentane-1,3-diyl Diradicals in Solution.

4.1 Introduction
4.2 Experimental
4.3 Results and discussion
   4.3.1 Time-resolved IR absorption spectra
   4.3.2 Singlet diradical DR1
   4.3.3 Triplet diradical DR2
   4.3.4 Observed CN stretching wavenumbers
   4.3.5 Calculated CN stretching wavenumbers
4.4 Conclusion
