

学位請求論文の要約

**Theoretical study for morphodynamics of sand dunes and
snow avalanches regulated by aeolian process in surface layer**
by Hirofumi Niiya

**Department of Mathematical and Life Sciences,
Graduate School of Science,
Hiroshima University**

Content of the thesis

Part I Introduction

Chapter 1 General Introduction

Chapter 2 Review of Sand Dunes

Chapter 3 Review of Snow Avalanches

**Part II Morphodynamics of Sand Dunes under
Unidirectional Wind**

**Chapter 4 Transition of Dune Shapes by Environmental
Condition**

**Chapter 5 Stability of Transverse Dunes depending on
Presence of Sand Supply**

**Chapter 6 Stability of Barchans depending on Types of
Sand Supply**

**Part III Pattern Formation of Granular Avalanches
consisting of Low-Density Particles**

**Chapter 7 Flow Instability at Moving Front of
Granular Avalanches**

**Chapter 8 Size Distribution and Initial Setup Dependence
of Head Formation**

Part IV Remarks

Chapter 9 Discussion and Future Work
