

**Time-resolved IR Spectroscopy of Radicals
in Chemical Reactions**

(化学反応中のラジカル種の時間分解赤外分光)

by Akihiro Maeda (前田 晃宏)

**Department of chemistry,
Graduate School of Science,
Hiroshima University**

Contents of the thesis

Chapter 1. General Introduction

- 1.1 Introduction
- 1.2 Time-resolved IR spectrometer
- 1.3 IR observation of the photocatalytic degradation of pivalic acid on TiO₂ powder
- 1.4 IR observation of cyclopentane-1,3-diyl diradicals in solution

References

Chapter 2. Time-resolved IR Spectrometer

- 2.1 Introduction
- 2.2 The constructed Time-resolved IR spectrometer
- 2.3 TRIR observation with the constructed TRIR spectrometer
- 2.4 Estimation of the time resolution of the TRIR spectrometer
- 2.5 The cells used for the TRIR measurement

References

Chapter 3. IR Observation of the Photocatalytic Degradation on TiO₂ Powder

- 3.1 Introduction
- 3.2 IR observation of the photocatalytic degradation of pivalic acid on TiO₂ powder
 - 3.2.1 Purpose of research
 - 3.2.2 Sample preparation
 - 3.2.3 Results and discussion
- 3.3 Summary and conclusions

References

Chapter 4. IR Observation of Cyclopentane-1,3-diyl Diradicals in Solution.

4.1 Introduction

4.2 Experimental

4.3 Results and discussion

4.3.1 Time-resolved IR absorption spectra

4.3.2 Singlet diradical DR1

4.3.3 Triplet diradical DR2

4.3.4 Observed CN stretching wavenumbers

4.3.5 Calculated CN stretching wavenumbers

4.4 Conclusion

References

Appendix A

Chapter 5. General Conclusion
