

学位論文要約

**Structural and Magnetic Phase Transitions in the Layered Perovskite-Like
Compounds $(\text{CH}_3\text{NH}_3)_2[\text{Fe}^{\text{II}}\text{Cl}_4]$ and $(\text{C}_2\text{H}_5\text{NH}_3)_2[\text{Fe}^{\text{II}}\text{Cl}_4]$**

ペロブスカイト型テトラクロロ鉄(II)メチルアンモニウムとテトラクロロ鉄(II)
エチルアンモニウムの構造、
磁気物性と相転移の研究
韓晶

Content of the thesis

Preface

Chapter I Introduction.....	3
I-1. Multiferroic.....	3
I-2. Magnet	7
(1) Ferromagnetism.....	8
(2) Diamagnetism.....	9
(3) Paramagnetism	9
(4) Canted antiferromagnetism	10
(5) Metamagnetism	12
I-3. Russell-Saunders or L-S coupling scheme.....	14
I-4. References.....	22
Chapter II Instruments and techniques.....	29
II-1. Infrared spectroscopy.....	29
II-2. Thermal analysis.....	30
II-3. X-ray diffraction (XRD).....	30
II-4. Magnetic susceptibility measurement.....	30

Chapter III Experimental section.....	32
--	-----------

III-1. Syntheses and characterization of ammonium chloride compounds	32
---	-----------

Chapter IV (CH₃NH₃)₂[Fe^{II}Cl₄]

IV-1. Abstract.....	34
----------------------------	-----------

IV-2. Introduction.....	34
--------------------------------	-----------

IV-3. Results and discussion.....	36
--	-----------

IV-3.1. Synthesis.....	36
-------------------------------	-----------

IV-3.2. Thermogravimetric analyses.....	37
--	-----------

IV-3.3. Differential thermal analyses.....	37
---	-----------

IV-3.4. Crystal structures.....	38
--	-----------

IV-3.5. Powder X-ray diffraction.....	51
--	-----------

IV-3.6. Magnetic properties.....	51
---	-----------

IV-3.7. Ac-susceptibilities.....	52
---	-----------

IV-3.8. Isothermal magnetization on single crystals.....	55
---	-----------

IV-3.9 Hysteresis loops.....	57
-------------------------------------	-----------

IV-3.10. Mechanism for structural transformation.....	59
--	-----------

IV-3.11. Proposed magnetic structures.....	60
---	-----------

IV-4. Conclusion.....	61
------------------------------	-----------

IV-5. References.....	62
------------------------------	-----------

Chapter V (CH₃CH₂NH₃)₂[Fe^{II}Cl₄]

V-1. Abstract.....	64
---------------------------	-----------

V-2. Introduction.....	65
-------------------------------	-----------

V-3. Results and discussion.....	68
---	-----------

V-3.1. Synthesis.....	67
------------------------------	-----------

V-3.2. Thermogravimetric analyses.....	67
---	-----------

V-3.3. Crystal structures.....	68
---------------------------------------	-----------

V-3.4. Mechanism for structural transformation.....	78
--	-----------

V-3.5. Powder X-ray diffraction.....	78
---	-----------

V-3.6. Magnetic properties.....	79
--	-----------

V-3.7. Ac-susceptibilities.....	79
--	-----------

V-3.8. Isothermal magnetization on single crystals.....	83
V-3.9. Hysteresis loops.....	87
V-4. Conclusion.....	91
V-5. References.....	92
Chapter VI Conclusion.....	94
Acknowledgement.....	95
