Construction of Sequence-Controlled Supramolecular Polymers

Formed by Unique Molecular Recognition

(特異な分子認識により配列制御された超分子ポリマーの合成)

平尾 岳大

Department of Chemistry, Graduate School of Science, Hiroshima University

## Content of the thesis

### Chapter I General Introduction

- I-1 Supramolecular Chemistry
- I-2 Supramolecular Polymers
- I-3 Overview of the Present Thesis
- I-4 References

### Chapter II Supramolecular Fullerene Polymers and Networks

- II-1 Introduction
- II-2 Synthesis of di- and tritopic host molecules and dumbbell-shaped fullerenes
- II-3 Molecular Association of calix[5]arene hosts and dumbbell-shaped fullerenes
- II-4 Supramolecular polymerization of di- and tritopic hosts  
and dumbbell-shaped fullerenes
- II-5 Morphologies of supramolecular polymers in the solid state
- II-6 Conclusion
- II-7 Experimental
- II-8 References

### Chapter III Supramolecular Porphyrin Polymers

- III-1 Introduction
- III-2 Synthesis of heteroditopic monomers
- III-3 Host-guest complexation between bisporphyrin and TNF of  
heteroditopic monomer
- III-4 Supramolecular polymerization of heteroditopic monomer
- III-5 Morphology of supramolecular polymers in the solid state
- III-6 Conclusion
- III-7 Experimental
- III-8 References

## **Chapter IV Supramolecular Porphyrin Networks**

- IV-1 Introduction
- IV-2 Supramolecular polymerization of heteroditopic Zn(II)bisporphyrin monomer
- IV-3 Supramolecular cross-linking of porphyrin supramolecular polymer
- IV-4 Elastic properties of cross-linked supramolecular polymer
- IV-5 Morphological study in the solid state
- IV-6 Conclusion
- IV-7 Experimental
- IV-8 References

## **Chapter V Sequence-Regulated Supramolecular Terpolymer**

- V-1 Introduction
- V-2 Synthesis of monomers
- V-3 Specific host-guest complexation
- V-4 Formation of supramolecular terpolymer
- V-5 Morphological study in the solid state
- V-6 Conclusion
- V-7 Experimental
- V-8 References
