

## 学位論文要約

### **Reconstruction of Paleo-Pacific Oceanic Crust subducted along the Eastern Margin of Asia constrained by the Geochemistry and Geochronology of the Paleozoic Ophiolite**

(古生代オフィオライトの地球化学と年代学による  
アジア東縁に沈み込んだ古太平洋海洋地殻の復元)

木村 光佑

Department of Earth and planetary Systems Science,  
Graduate School of Science,  
Hiroshima University

### **Content of the thesis**

Preface

Abstract

**Chapter 1 Introduction**

**Chapter 2 Protolith age and tectonic evolution of Yakuno ophiolite, Maizuru Terrane, Inner zone of Southwest Japan**

**Chapter 3 Protolith age and origin of Oeyama ophiolite, Nomo and Yamaga metagabbroic body of the Sangun-Renge Belt, Inner zone of Southwest Japan and their tectonic evolution**

**Chapter 4 Zircon U-Pb ages, origins and belongings of metagabbro from Kotozawa Igneous Rocks and tonalitic leucosome from Kuratani Metamorphic Rocks of Maizuru Terrane in the Kotaki area, central Japan**

**Chapter 5 Mantle chemical diversity and Carboniferous superplume activity from greenstones in the accretionary complexes and ophiolites from Southwest Japan**

**Chapter 6 Discussion**

**Chapter 7 Summary**

**Appendix**
