

Thesis Abstract

Deformation processes of crustal-scale faults depending on depth: Studies of paleo- and active orogenic belts from Indian continent

(深度に依存する地殻スケール断層の変形過程：インド大陸における古造山帯と活動的な造山帯の研究)

Content of the thesis

Abstract

Table of contents

List of figures

List of tables

Acknowledgments

Chapter 1 GENERAL INTRODUCTION

Chapter 2 INTEGRATED STUDIES ON DEFORMATION MECHANISMS AND TECTONIC IMPLICATIONS FROM SERPENTINITES OF THE RAKHABDEV LINEAMENT IN WESTERN INDIA

Chapter 3 DEFORMATION MICROSTRUCTURES AND DETRITAL ZIRCON GEOCHRONOLOGY OF FAULT ROCKS FROM MAIN BOUNDARY THRUST (MBT) IN NORTH-WEST HIMALAYAS

Chapter 4 FAULT ZONE ARCHITECTURE AND DEFORMATION MECHANISMS FROM THE NAHAN THRUST (NT) IN NORTH-WEST HIMALAYAS

Chapter 5 CARBONATE CLUMPED ISOTOPE THERMOMETRY AS AN ALTERNATIVE IN ESTIMATING DEFORMATION TEMPERATURES FROM MBT AND NT

Chapter 6 SUMMARY
