

学位論文要約

Light- and spin- induced electronic structures of novel topological materials

(光およびスピんに誘起された新奇トポロジカル物質の電子構造)

Tomoki Yoshikawa

Department of Physical Science,
Graduate School of Science,
Hiroshima University

Content of the thesis

Chapter 1 Introduction

Chapter 2 Background

Chapter 3 Experimental principle

Chapter 4 Experimental systems

Chapter 5 Time- and angle resolved photoemission spectroscopy on topological insulators

Chapter 6 X-ray magnetic circular dichroism on Co_2MnGe (Ga)

Chapter 7 Summary

Acknowledgements
