

## 学位論文要約

### Geometric and Electronic Structures of Host–Guest Complex Ions Investigated by Cold Gas-Phase Spectroscopy

(極低温・気相分光法によるホスト–ゲスト錯イオンの立体構造と電子状態に関する研究)

木田 基

Department of Chemistry, Graduate School of Science, Hiroshima University

## Content of the thesis

Acknowledgements

### Chapter 1 GENERAL INTRODUCTION

*1.1 Host–Guest Chemistry*

*1.2 Crown Ether*

*1.3 Purpose and Outline of This Study*

*1.4 References*

### Chapter 2 EXPERIMENTAL & COMPUTATIONAL

*2.1 Ultraviolet Photodissociation (UVPD) Spectroscopy*

*2.2 UV–UV Hole-Burning (HB) Spectroscopy*

*2.3 Quantum Chemical Calculations*

*2.4 References*

### Chapter 3 Dibenzo-Crown Ether Complexes with Alkali Metal Ions

*3.1 Introduction*

*3.2 Experimental and Computational*

*3.3 Results and Discussion*

*3.3.1 UVPD Spectra and Structure of Dibenzo-CE Complexes*

*3.3.2 Fluorescence Spectra of Dibenzo-CE Complexes in Solution*

*3.4 Summary*

*3.5 References*

## **Chapter 4 Protonated Dibenzylamine–Crown Ether Complexes ‘Pseudorotaxane’**

### ***4.1 Introduction***

### ***4.2 Experimental and Computational***

### ***4.3 Results and Discussion***

#### ***4.3.1 Structure and Energetics of Bare dBAMH<sup>+</sup>***

#### ***4.3.2 Structure and Energetics of dBAMH<sup>+</sup>–CE Complexes***

## **Chapter 5 CONCLUDING REMARKS**

## **Chapter 6 FURTHER RESULTS**

### ***6.1 UVPD Spectrum of dBAMH<sup>+</sup>–21C7 Complex***

### ***6.2 Structure of dBAMH<sup>+</sup>–21C7 Complex***

### ***6.3 <sup>1</sup>H NMR Spectra of dBAMH<sup>+</sup>–CE Complexes***

### ***6.4 Summary***
