

学位論文要約

Photodissociation Dynamics of Heteroleptic Transition-Metal Nitrosyl
Co(CO)₃NO Complex in the Ultraviolet and Visible Absorption Bands

(ヘテロレプティック遷移金属ニトロシル錯体 Co(CO)₃NO の
紫外・可視吸収帯における光解離ダイナミクス)

中田 裕之

Department of Chemistry,
Graduate School of Science,
Hiroshima University

Contents of the thesis

- Chapter 1** General Introduction
 - Chapter 2** Experimental Methods and Apparatus
 - Chapter 3** Stereo-Selective NO Elimination Dynamics in the Deep-UV Band
 - Chapter 4** Competitive CO and NO Loss in the Deep-UV Band
 - Chapter 5** Photoelimination of the NO Ligand in Two Absorption Bands
 - Chapter 6** General Conclusion
- Acknowledgements
