

Thesis Abstract

Determination of mantle characteristics below south west Japan: inferred from trace element and Sr-Nd-Pb isotope compositions of basalts from Kyushu island, southwest Japan arc

(西南日本弧九州地域の玄武岩の微量元素およびSr-Nd-Pb同位体組成をもちいた西南日本直下のマンツルの地球化学的研究)

Content of the thesis

Preface

Abstract

Chapter 1 Introduction

Chapter 2 Geotectonic background of south west Japan volcanism

Chapter 3 Analytical methods

Chapter 4 Separation of Pb, Sr and REE from silicates for isotopic analysis: a new method

Chapter 5 Results and discussion

Chapter 6 Conclusion

Appendix
