NERPS SPECIAL LECTURE

This lecture is jointly organized with Mistra Geopolitics and funded by Mirai 2.0.

THE GEOPOLITICS OF SUSTAINABILITY TRANSFORMATIONS

Friday, 28 October 2022

10:00 - 11:00 AM

Mirai Crea 2F Large Conference Room

PROF. BJÖRN-OLA LINNÉR

Professor in Environmental Change at the Center for Climate Science and Policy Research, Linköping University

This NERPS Special Lecture addresses the geopolitical risks and opportunities arising from three interconnected societal transformations: global environmental change, societal transformations towards sustainability goals, and the rapid deployment of transformative technologies. It discusses how these transformative processes are re-making the scene for global politics and governance, and thereby shaping the prospects for advancing the implementation of the 2030 Agenda and the Paris Agreement. The presentation will draw on findings from the 8-year research programme Mistra Geopolitics (www.mistra-geopolitics.se) and its analyses of the geopolitics of decarbonization food security, sustainable oceans, and emerging technologies.
