

Thesis Abstract

Cationic Surfactant for Remediation of ^{137}Cs -contaminated Soil and the Influence of Its Head Group Structure on the Cs Desorption from Clays and Clay Minerals
(^{137}Cs で汚染した土壌修復のためのカチオン界面活性剤とそのヘッドグループ構造の粘土と粘土鉱物からの Cs 除去への影響)

Content of the thesis

Contents

Chapter 1 General Introduction

Chapter 2 Comparison of Cationic Surfactant and Acid Solution for Remediation of Actual ^{137}Cs -contaminated Soil from Fukushima Prefecture

Chapter 3 Influence of Head Group Structure of Cationic Surfactants on the Desorption of Cs from Clays and Clay Minerals

Chapter 4 General Conclusions

References
