

International workshop for The health impact of meteorological factors: A multinational comparative approach

International Joint Research supported by
The Pfizer Health Research Foundation

10th October 2023 15:00 – 17:00

Phoenix International Center MIRAI CREA,
HIROSHIMA UNIVERSITY, JAPAN

Keynote Lecture:

Israel: Department of Epidemiology, Biostatistics and Community Health, Ben-Gurion University
Professor Emeritus, **Michael FRIGER**

“**Methodology, strengths, and challenges of multinational comparative study: The health impact of meteorological factors in Israel**”

Panelists:

Japan: Department of Health Informatics, Graduate School of Biomedical & Health Sciences, Hiroshima University

Professor Emeritus, **Masayuki KAKEHASHI**

Lecturer, **Miwako TSUNEMATSU**

“**Weather conditions and health: Our approach so far and ideas for future**”

Japan: Center for the Planetary Health and Innovation Science (PHIS),
The IDEC Institute, Hiroshima University

PHIS Director, Associate Professor, **Saori KASHIMA**

“**The health impact of meteorological factors on cardiovascular disease in Japan**”

Pakistan: Pakistan Meteorological Department, Government of Pakistan
Electronic Engineer, **Ali WAQAS**

“**The health impact of meteorological factors on epilepsy in Japan**”

Spain: Institute of Environmental Assessment and Water Research,
Spanish Research Council, Barcelona, Spain

Associate Professor, Aurelio Tobias

“**From research to developing an innovative application for monitoring heat-related mortality in Spain.**”

Germany: The IUF-Leibniz Research Institute of
Environmental Medicine in Duesseldorf

Professor Tamara SCHIKOWSKI and Ashtyn Tracey AREAL

“**Meteorological effects on health: a German perspective**”

Contact : Saori KASHIMA
